Includes music. A fun and exciting guide to the world of living out at sea. This book will teach you what you need to know in order to live safely, economically and cheaply when spending months at sea. If nothing else, this book will send you chasing for your dreams, whether it be to take an adventure at sea or just about anything else. This is the first of a four-book series which begins on the journey that Lin and Larry Pardey began 34 years ago in their self-built 24-foot engineless cutter, *Seraffyn*. In this journey, we explore places such as Mexico, Central America, the Caribbean, and the Islands of the Atlantic ocean. Throughout the book, we learn about people and customs, we learn about the tricks of boating, we learn about survival. This 25th anniversary edition includes a new forward, new appendixes, and a color photo album showing Lin, Larry and the *Seraffyn* during those months at sea. 1890-1926 include also Decisions of the Board of U.S. general appraisers no. 1-9135. A handbook on sailing classic boats by the 'guru of gaff-rig sailors', replete with illustrations and clear descriptions of techniques that are unique to the classic boat world. Lin and Larry Pardey

have now been cruising on board their own boats, racing, delivering, and repairing other people's boats for more than 44 years. After west-to-east and east-to-west circumnavigations, and voyages to more than 75 countries, they have a breadth of knowledge that few other boating authors possess. Most of the voyaging has been done on an earn-as-you-go budget that could be well within the reach of the majority of those whose dream is to set sail. Their motto? "Go small, go simple, but go now!" The Pardeys' strengths are neatly symbolized by the boats they have built. Each one is romantically traditional, with swooping sheerlines, and is completely dependent on the wind. And yet each boat carries the best, strongest, and most seamanlike gear. Like their vessels, the Pardeys' writings are founded on a marriage of the spirit of romantic adventure and the practical, up-to-date seamanship that keeps them and their boats safe. This revised and expanded third edition of a cruising classic includes 10 completely new chapters with such advice as: sixteen ways to encourage your lover (partner) to share your dream; strategies for turning sudden engine failure into a minor incident; choosing safety equipment; repairing rigging at sea. All of the original chapters have been

updated to ensure that the information will be helpful for everyone who dreams of cruising—whether now or soon. The Capable Cruiser is a logical extension of the Pardeys' The Self-Sufficient Sailor, with more emphasis on seamanship underway, including careful analysis of extreme anchoring situations and solutions for mitigating them. Underlying each and every chapter is the warmth and encouragement that spurred Herb McCormick, former editor of Cruising World magazine, to label Lin and Larry Pardey "the enablers." Cutter's Crossing contains three stories about a small farm town in Central Arkansas during the 1950s and '60s. It is fiction but based on true events and interesting people. All three stories in this book are linked together, showing how important it was during this time to have good family and friends close to you. Everyone needs help sometimes, and these people in Cutter's Crossing were the kind of people that you wanted living close to you when times ever got tough for you. Read this book and you may find some of the people will be very familiar to you. You can see in these stories how different people were then, and how people are now. An illustrated analysis of a unsigned oil painting from the Ashcan School Era of American Art The pilot cutters that operated around the coasts of northern Europe until the First World War were amongst the most seaworthy and beautiful craft of their size ever built, while the small number that have survived

have inspired yacht designers, sailors and traditional craft enthusiasts over the last hundred years.??Even in their day they possessed a charisma unlike any other working craft; their speed and close-windedness, their strength and seaworthiness, fused together into a hull and rig of particular elegance, all to guide the mariner through the rough and tortuous waters of the European seaboard, bought them an enviable reputation.??This new book is both a tribute to and a minutely researched history of these remarkable vessels. The author, perhaps the most experienced sailor of the type, describes the ships themselves, their masters and crews, and the skills they needed for the competitive and dangerous work of pilotage. He explains the differences between the craft of disparate coasts of the Scilly Isles and the Bristol Channel, of northern France, and the wild coastline of Norway and weaves into the history of their development the stories of the men who sailed them.??Written to complement the recent histories of pilot schooners and open boat pilotage, edited and written by the author, this book will be an essential addition to the libraries of historians and enthusiasts of traditional boats.??As seen in the Wiltshire Times.
