**The Fourfold Path** Nov 10 2020 How Do We Become Free and Enter into the Mystery of Life? The Fourfold Path takes us on a healing journey inspired by the philosopher Plato and his teachings on how to know yourself by transcending all limitations within the human space. The model of transcendence leaves behind the metaphors we live by to pioneer humankind into the deepest and most powerful gnosis ever attained through the love of wisdom. Through transcendence, you can discover how to free yourself from the suffering that obstructs the complete vision of the soul. You can heal from the unconscious processes and go beyond the limitations of the ego. Once you have learned the Path, you can attain enlightenment and become like God, and attain the characteristics of divinity, immortality, and bliss. Transcendence is basic to all human cultures who move through the limitless possibilities given to humankind to evolve using the wisdom of the mind and the wisdom of the heart. This wisdom invites us to go deeper and move from self-realization to knowledge of God. Life itself inspires this change through the experiences of love, birth, death, miracles, blessings, and family. True enlightenment occurs when we process these life experiences as lessons on a soul journey that initiate a spiritual awakening. It is as simple as arguing that there are two identities: a true self and a false self. Philosophy is the means to know the difference between the two, while transcendence is the path that can lead humankind to know the truth. When humankind comes to know their true selves, they will be set free from suffering. This is the ascent toward what Plato called The Good, which many believe is also called God. The Fourfold Path shows us how to leave behind the limitations of the human space to discover a sacred place in communication and communion with Spirit, so you can become one with God and find true happiness.

**Teranesia** Mar 27 2022 Welcome to Teranesia, the island of butterflies, where evolution has stopped making sense. Prabir Suresh lives in paradise, a nine-year-old boy with an island all his own: to name, to explore, and to populate with imaginary creatures stranger than any exotic tropical wildlife. Teranesia is his kingdom, shared only with his biologist parents and baby sister Madhusree. The evolutionary puzzle of the island's butterflies that brought his family to the remote South Moluccas barely touches Prabir; his own life revolves around the beaches, the jungle, and the schooling and friendships made possible by the net. When civil war breaks out across Indonesia, this paradise comes to a violent end. The mystery

of the butterflies remains unsolved, but nearly twenty years later reports begin to appear of strange new species of plants and animals being found throughout the region — species separated from their known cousins by recent, dramatic mutations that seem far too useful to have arisen by chance from pollution, disease, or any other random catastrophe. Madhusree is now a biology student, proud of her parents' unacknowledged work, and with no memories of the trauma of the war to discourage her, she decides to join a multinational expedition being mounted to investigate the new phenomenon. Unable to cast off his fears for her safety, Prabir reluctantly follows her. But travel between the scattered islands is difficult, and Madhusree has covered her tracks. In the hope of finding her, Prabir joins up with an independent scientist, Martha Grant, who has come to search for both clues to the mystery and whatever commercial benefits it might bring to her sponsor. As Prabir and Martha begin to untangle the secret of Teranesia, Prabir is forced to confront his past, and to face the painful realities that have shaped his life.

*The Locke Reader* May 17 2021 John Yolton seeks to allow readers of Locke to have accessible in one volume sections from a wide range of Locke's books, structured so that some of the interconnections of his thought can be seen and traced. Although Locke did not write from a system of philosophy, he did have in mind an overall division of human knowledge. The readings begin with Locke's essay on Hermeneutics and the portions of his Essay Concerning Human Understanding on how to read a text. The rest of the selections are organized around Locke's division of human knowledge into natural science, ethics, and the theory of signs. Yolton's introduction and commentary explicate Locke's doctrines and provide the reader with the general background knowledge of other seventeenth-century writers and their works necessary to an understanding of Locke and his time.
