The Rice Economy of Asia Jul
09 2021 The purpose of this
book is to present a
comprehensive picture of the
role of rice in the food and
agricultural sectors of Asian
nations.

Southeast Asia Aug 10 2021
Southeast Asia: A Testament gives a personal account of the US involvement in Indochina and covers the tragic history of post war Indonesia from its successful struggle against the Dutch to Suharto's bloody overthrow of Sukarno in 1965.

The Heart of Asia Jan 03 2021 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a

historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Corruption and the Destiny of Asia Jul 29 2020 Professor Alatas is a pioneer in the study of corruption in Asia. This volume represents 30 years' intellectual outpourings on the complexities of corruption and the damage it does to the social fabrics of developing countries.

The Heart of Asia Sep 23 2022 Originally published in 1899, *The Heart of Asia* is a definitive history of Central Asia from pre-history to the contemporary machinations of the Russian empire. The book is valuable not only because of the quality of the historical work on the early period, but also because of the unique

picture that it gives of contemporary views on the potential for Anglo-Russian conflict, at a time when the Russian Empire was Britain's closest rival for Asian hegemony. Scholars of modern Russia and Central Asia will find much that echoes, and indeed drives, more recent events. Includes 34 illustrations and two maps.

The United States in Asia Jun 27 2020 "Shavit's historical dictionary addresses the critical need in academic libraries for reference sources that provide students of American foreign policy with introductory information on the persons, events, and institutions that have influenced US relations with other nations. . . . A useful dictionary." Choice

Asia in Washington Apr 18 2022 For several centuries, international relations has been primarily the purview of nation-states. Key powers have included at various times Great Britain, France, Japan, China, Russia (then the U.S.S.R., and then Russia again), and the

nation most influential in international relations for the past several decades has been the United States. But in a world growing smaller, with a globalizing system increasing in complexity by the day, the nation-state paradigm is not as dominant as it once was. In Asia in Washington, longtime Asia analyst Kent Calder examines the concept of "global city" in the context of international affairs. The term typically has been used in an economic context, referring to centers of international finance and commerce such as New York, Tokyo, and London. But Calder extends the concept to political centers as well—particularly in this case, Washington, D.C. Improved communications, enhanced transportation, greater economic integration and activity have created a new economic village, and global political cities are arising within the new structure—distinguished not by their CEOs or stock markets but by their influence over policy decisions, and their

amassing of strategic intelligence on topics from national policy trends to geopolitical risk. Calder describes the rise of Washington, D.C., as perhaps the preeminent global political city—seat of the world's most powerful government, center of NGO and multilateral policy activity, the locale of institutions such as the World Bank and IMF, and home to numerous think tanks and universities. Within Washington, the role of Asia is especially relevant for several reasons. It represents the core of the non-Western industrialized world and the most challenge to Western dominance. It also raises the delicate issue of how race matters in international global governance—a factor crucially important during a time of globalization. And since Asia developed later than the West, its changing role in Washington raises major issues regarding how rising powers assimilate themselves into global governance structure. How do Asian nations

establish, increase, and leverage their Washington presence, and what is the impact on Washington itself and the decisions made there? Kent Calder explains it all in *Asia in Washington*.

Economic Successes in South Asia Aug 30 2020 This book analyses economic successes in South Asia and the reasons why they emerge by offering an in-depth analysis of a few case studies against the backdrop of overall policy context and economic performance of these countries. Offering a brief comparative review of South Asia in a global context, the book shows that the region remains an economically and socially lagging region. The author argues that within South Asia, most countries demonstrate examples of economic or social success. This book explores such successes that provide lessons for other South Asian countries and beyond. Case studies include the textile industry and microcredit in Bangladesh, information technology in India, forestry management in

Nepal, surgical and sports goods in Pakistan, and human development in Sri Lanka. At the macro level, the book discusses India's catch-up growth first given the country's global importance and because of the prominence of the debate on its catch-up growth to development economics. A novel addition to the literature with its focus on successful initiatives with broad policy implications, this book will be of interest to researchers in the field of development economics, development studies and South Asian Studies, in particular South Asian policy.

Banking on the Future of Asia and the Pacific May 07 2021 This book is a history of the Asian Development Bank (ADB), a multilateral development bank established 50 years ago to serve Asia and the Pacific. Focusing on the region's economic development, the evolution of the international development agenda, and the story of ADB itself, this book raises several key questions: What are the

outstanding features of regional development to which ADB had to respond? How has the bank grown and evolved in changing circumstances? How did ADB's successive leaders promote reforms while preserving continuity with the efforts of their predecessors? ADB has played an important role in the transformation of Asia and the Pacific the past 50 years. As ADB continues to evolve and adapt to the region's changing development landscape, the experiences highlighted in this book can provide valuable insight on how best to serve Asia and the Pacific in the future.

Five Decades of Urbanization in Southeast Asia Mar 05 2021

Cyber Communities in Rural Asia Dec 02 2020 "This book focuses on the extent to which the Internet is fast penetrating the semi-urban and rural areas of Asia and the ways in which rural communities are accessing and using the Internet. It examines the infrastructure, use, and impact of the Internet at the

grassroots level in seven representative South Asian and Southeast Asian countries: Bangladesh, China, India, Indonesia, Laos, the Philippines, and Sri Lanka. These countries are at various stages of development in their attempts to build epistemic societies, bridge the digital divide, and improve access to services delivered through the Internet for their citizens leading to the gradual development of the cyber communities." "The case studies and surveys are supported by secondary data and interviews. The major areas of concern include frequency of access, time spent, and purposes of using the Internet. The problems faced by the citizens, including those of infrastructure, content, and social factors are examined to evaluate how these barriers could be sorted out in the future. The challenges faced by governments in transforming their societies into the epistemic variety and much of the debate and interventions

within these countries have been identified and compared, leading to a better understanding of how the Internet can catalyze development in Asia."--BOOK JACKET.

Arts of South Asia Oct 12 2021

The volume looks at how South Asian art was sourced for external appreciation at a variety of institutions in Europe, North America, and Asia from the mid-19th century onward. These essays speak to the colonial legacies that created such collections but that now must be viewed through a post-colonial lens. The volume also addresses contemporary concerns for today's museums: collecting, building and practices, provenance, and repatriation.

Gender in Modern East Asia

Nov 13 2021 This

chronologically-organized text explores major themes in the history of gender (including politics, urban/rural lives, modernity, nationalism and war) in China, Japan and Korea, from medieval times to the present, with an emphasis

on the modern era. Brief primary sources are included. *By More Than Providence* May 27 2020 Soon after the American Revolution, certain of the founders began to recognize the strategic significance of Asia and the Pacific and the vast material and cultural resources at stake there. Over the coming generations, the United States continued to ask how best to expand trade with the region and whether to partner with China, at the center of the continent, or Japan, looking toward the Pacific. Where should the United States draw its defensive line, and how should it export democratic principles? In a history that spans the eighteenth century to the present, Michael J. Green follows the development of U.S. strategic thinking toward East Asia, identifying recurring themes in American statecraft that reflect the nation's political philosophy and material realities. Drawing on archives, interviews, and his own experience in the Pentagon and White House,

Green finds one overarching concern driving U.S. policy toward East Asia: a fear that a rival power might use the Pacific to isolate and threaten the United States and prevent the ocean from becoming a conduit for the westward free flow of trade, values, and forward defense. *By More Than Providence* works through these problems from the perspective of history's major strategists and statesmen, from Thomas Jefferson to Alfred Thayer Mahan and Henry Kissinger. It records the fate of their ideas as they collided with the realities of the Far East and adds clarity to America's stakes in the region, especially when compared with those of Europe and the Middle East.

A History of Asia May 19 2022 Charts the deep, diverse history of the largest continent A History of Asia is the only text to cover the area known as "monsoon Asia"--India, China, Korea, Japan, and Southeast Asia--from the earliest times to the present. Written by leading scholar Rhoads Murphey, the

book uses an engaging, lively tone to chronicle the complex political, social, intellectual, and economic histories of this area. Popular because of its scope and coverage, as well as its illustrations, maps, and many boxed primary sources, the new edition of *A History of Asia* continues as a leader in its field.

Terrorism and Insurgency in Asia: A Contemporary Examination of Terrorist and Separatist Movements

Apr 25 2020 The rise of the Islamic State since 2014 has led to the re-emergence of terrorism as a serious security threat in Asia. Coupled with the ongoing terrorism and insurgency challenges from both radical religious extremists and also ethno-nationalist insurgencies, it is clear that some parts of Asia remain mired in armed rebellion despite decades of nation-building. While the situation in Afghanistan and Pakistan has obviously deteriorated, there is also a growing terrorist challenge, on top of armed insurgencies, in

other parts of Asia. A common theme in armed rebellions in the region has been the lack of legitimacy of the state and the presence of fundamental causes stemming from political, economic or social grievances. Addressing rebellion in the region thus requires a comprehensive approach involving transnational co-operation, addressing fundamental grievances, and also the use of more innovative approaches, such as religious rehabilitation and reconciliation programmes.

Southeast Asia Nov 01 2020 Includes the following countries: Myanmar (Burma), Thailand, Cambodia, Laos, Vietnam, Malaysia, Singapore, Indonesia, Brunei, and the Philippines.

East Asia Aug 22 2022 Throughout his distinguished career, Rhoads Murphey has advocated an appreciation of the rich and unique aspects of Asian history, making his text an unparalleled success. Spanning the histories of China, Japan, Korea, Vietnam, and parts of Southeast Asia,

East Asia: A New History furthers students' knowledge by covering a breadth of topics, including everyday life, the environment, and women in Asian history. Book jacket.

The Body in Asia Aug 18 2019 The past few decades have seen growing interest in the study of the body, not least thanks to Michel Foucault's historical studies of medicine in the 1970s, which inspired the initial development of the contemporary study of the human body. However, the increasing number of exciting and influential publications has primarily, if not exclusively, focused on the body in Western cultures. The various works produced by Asian scholars remain largely unknown to Western academic debates even though Asia is home to a host of rich body cultures and religions. The peoples of Asia have experienced colonization, decolonization, and now globalization, all of which make the "body in Asia" a rewarding field of research. This volume is unique, as it brings together into a single volume a number

of scholars who work on East, Southeast and South Asia and presents original and cutting-edge research on the body in various Asian cultures.

The Great Hill Stations Of Asia

Feb 04 2021 Describes the health spas, convalescent centers, and resort towns created by Europeans in the Asian mountains during colonialism

The Changing Map of Asia - A Political Geography Feb 16

2022 PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any

bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the care of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and

can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, - such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of

the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

The Future Is Asian Dec 22 2019 In the 19th century, the world was Europeanized. In the 20th century, it was Americanized. Now, in the 21st century, the world is being Asianized. The “Asian Century” is even bigger than you think. Far greater than just China,

the new Asian system taking shape is a multi-civilizational order spanning Saudi Arabia to Japan, Russia to Australia, Turkey to Indonesia—linking five billion people through trade, finance, infrastructure, and diplomatic networks that together represent 40 percent of global GDP. China has taken a lead in building the new Silk Roads across Asia, but it will not lead it alone. Rather, Asia is rapidly returning to the centuries-old patterns of commerce, conflict, and cultural exchange that thrived long before European colonialism and American dominance. Asians will determine their own future—and as they collectively assert their interests around the world, they will determine ours as well. There is no more important region of the world for us to better understand than Asia - and thus we cannot afford to keep getting Asia so wrong. Asia’s complexity has led to common misdiagnoses: Western thinking on Asia conflates the entire region with China, predicts imminent

World War III around every corner, and regularly forecasts debt-driven collapse for the region's major economies. But in reality, the region is experiencing a confident new wave of growth led by younger societies from India to the Philippines, nationalist leaders have put aside territorial disputes in favor of integration, and today's infrastructure investments are the platform for the next generation of digital innovation. If the nineteenth century featured the Europeanization of the world, and the twentieth century its Americanization, then the twenty-first century is the time of Asianization. From investment portfolios and trade wars to Hollywood movies and university admissions, no aspect of life is immune from Asianization. With America's tech sector dependent on Asian talent and politicians praising Asia's glittering cities and efficient governments, Asia is permanently in our nation's consciousness. We know this will be the Asian century. Now we finally have an accurate

picture of what it will look like. **Stephen Roach on the Next Asia** Nov 20 2019 As Morgan Stanley's chief Asia specialist, getting Asia right is Stephen Roach's personal obsession, and this in-depth compilation represents more than 70 of Roach's key research efforts not just on Asia, but also on how the region fits into the broad context of increasingly globalized financial markets. The book argues that the "Asia factor" is not a static concept, but rather one that is constantly changing and evolving. Broken down into five parts—Asia's critical role in globalization; the coming rebalancing of the Chinese economy; a new pan-regional framework for integration and competition; and a frank discussion of the biggest risk to this remarkable transformation—this book will help readers understand and profit from the world's most dynamic region.

Democratization, National Identity and Foreign Policy in Asia Oct 20 2019 How can democratization move forward

in an era of populist-nationalist backlash? Many countries in Asia, and elsewhere, face the challenge of navigating between China and the United States in a period of intensifying polarization in their policies tied to democracy. East Asia has shown the way to democratization in Asia--with Japan, South Korea, and Taiwan linking national identity to democratization. In other parts of Asia, especially Southeast Asia, nationalist governments have tended to move away from democratization, as happened in Hong Kong at China's insistence. This book investigates how national identity can both help and hinder democratization, illustrated by a series of examples from across Asia. A valuable guide for students and scholars both of democratization and of Asian politics.

Asia Nov 25 2022 Describes the landscapes, plants, animals, history, and current conditions and ways of life of

the continent of Asia.

The Greening of Asia Sep 11 2021 A hopeful look at the next business boom: partnerships between Asian corporations, the government, and civil society to create new technologies that will help save the most crowded places on Earth.

Southeast Asia and the Cold

War Feb 22 2020 The origins and the key defining moments of the Cold War in Southeast Asia have been widely debated. This book focuses on an area that has received less attention, the impact and legacy of the Cold War on the various countries in the region, as well as on the region itself. The book contributes to the historiography of the Cold War in Southeast Asia by examining not only how the conflict shaped the milieu in which national and regional change unfolded but also how the context influenced the course and tenor of the Cold War in the region. It goes on to look at the usefulness or limitations of using the Cold War as an interpretative framework for

understanding change in Southeast Asia. Chapters discuss how the Cold War had a varied but notable impact on the countries in Southeast Asia, not only on the mainland countries belonging to what the British Foreign Office called the "upper arc", but also on those situated on its maritime "lower arc". The book is an important contribution to the fields of Asian Studies and International Relations.

[The Languages of East and Southeast Asia](#) Jan 23 2020

"This book introduces the linguistic diversity of East and Southeast Asia. It contains treatments of diverse areas including: word origins, cultural key words, tones and sounds, language families and typology, key syntactic structures, writing systems and communicative style" -- Provided by publisher.

The Awakening of Asia Apr 06 2021 A study of the influence of the white man on the Far East.

Islam and Asia Mar 17 2022 An accessible, transregional exploration of how Islam and

Asia have shaped each other's histories, societies and cultures from the seventh century to today.

Central Asia Jun 08 2021

Covers the countries of Uzbekistan, Kazakhstan and Kyrgyzstan, giving information about their geography, history and economy; their institutions of religion, government and education; and their society and contemporary issues.

The State of Asia Dec 14 2021

A History of Southeast Asia

Mar 25 2020 A History of Southeast Asia: Critical Crossroads presents a comprehensive history of Southeast Asia from our earliest knowledge of its civilizations and religious patterns up to the present day. Incorporates environmental, social, economic, and gender issues to tell a multi-dimensional story of Southeast Asian history from earliest times to the present Argues that while the region remains a highly diverse mix of religions, ethnicities, and political systems, it demands more

attention for how it manages such diversity while being receptive to new ideas and technologies Demonstrates how Southeast Asia can offer alternatives to state-centric models of history more broadly
2016 PROSE Award Honorable Mention for Textbook in the Humanities

The Heart of Asia Jan 15 2022

The Pulse of Asia Dec 26 2022

Internal Migration in the Countries of Asia Jul 21 2022

This book explores how population mobility varies among the countries of Asia. While much attention has been given to international migration, movement within countries is numerically much more significant. Coupling innovative methods developed in the global IMAGE project with the contextual knowledge of experts on 15 Asian countries, the book measures and explains how people across Asia differ in the probability of changing residence, the ages at which they move, and the impact of these migrations on

the distribution of human settlement within each country. It demonstrates how stage of economic development, coupled with historical events, local contingencies, cultural norms, political frameworks, and the physical environment shape human migration. By using rigorous statistics in a robust comparative framework, this book provides a clear understanding of contemporary migration in Asia for students and academics, and a valuable resource for policy-makers and planners in Asia and beyond.

Opening the Gates to Asia

Oct 24 2022 Over the course of less than a century, the U.S. transformed from a nation that excluded Asians from immigration and citizenship to one that receives more immigrants from Asia than from anywhere else in the world. Yet questions of how that dramatic shift took place have long gone unanswered. In this first comprehensive history of Asian exclusion repeal, Jane H. Hong unearths the transpacific movement that successfully ended restrictions

on Asian immigration. The mid-twentieth century repeal of Asian exclusion, Hong shows, was part of the price of America's postwar empire in Asia. The demands of U.S. empire-building during an era of decolonization created new opportunities for advocates from both the U.S. and Asia to lobby U.S. Congress for repeal. Drawing from sources in the United States, India, and the Philippines, *Opening the Gates to Asia* charts a movement more than twenty years in the making. Positioning repeal at the intersection of U.S. civil rights struggles and Asian decolonization, Hong raises thorny questions about the meanings of nation, independence, and citizenship on the global stage.

Orphan of Asia Jun 20 2022
Born in Taiwan, raised in the scholarly traditions of ancient China but forced into the Japanese educational system, Hu Taiming, the protagonist of *Orphan of Asia*, ultimately finds himself estranged from all three cultures. Taiming eventually makes his mark in

the colonial Japanese educational system and graduates from a prestigious college. However, he finds that his Japanese education and his adoption of modern ways have alienated him from his family and native village. He becomes a teacher in the Japanese colonial system but soon quits his post and finds that, having repudiated his roots, he doesn't seem to belong anywhere. Thus begins the long journey for Taiming to find his rightful place, during which he is accused of spying for both China and Japan and witnesses the effects of Japanese imperial expansion, the horrors of war, and the sense of anger and powerlessness felt by those living under colonial rule. Zhuoliu Wu's autobiographical novel is widely regarded as a classic of modern Asian literature and a groundbreaking expression of the postwar Taiwanese national consciousness.

[Changing Security Dynamics in East Asia](#) Sep 18 2019 There is a significant uncertainty around US security

commitment to East Asia over the next 15-20 years, underpinned by China's economic and military rise. This new collection investigates how and whether this affects the present-day strategic perceptions and behaviour of East Asian nations, and of the US itself. By exploring how regional actors deal with uncertainties that are inherent to the current geopolitical situation in East Asia, the contributors demonstrate that strategic uncertainty has become a major factor in the shaping of the security order in East Asia, which has resulted in the emergence of alternative models of order that do not necessarily exclude America. Asia Sep 30 2020 From one of the world's leading historians?a comprehensive narrative of the 3,000 years that have formed Asia's people, culture, and global destiny Tracing its origins in Mesopotamia to its modern role on the global geopolitical stage, historian Arthur Cotterell offers a compelling,

lively, and readable account of one of the most culturally diverse, and often misunderstood, parts of the world. Beginning with the emergence of the world's earliest civilization in 3000 BC, *Asia: A Concise History* provides a fascinating look at the global convulsions?like the rise and fall of Assyria and Persia, the medieval states that flourished after the advent of Islam, and the modern transformations triggered by the lightning conquests of imperial Japan?that have shaped the continent. Covers the great events and figures of Asian history, along with a look at the monumental remains that bear witness to those times: the ziggurats of Iraq, the Taj Mahal, the Great Wall of China, the temple of Angkor Wat Includes fascinating slices of history, including funeral arrangements for Qin Shi Huangdi in 210 BC; an extract from Lord Macartney's journal of his 1793 diplomatic mission to the Qing emperor Qian Long; and Toyotomi Hideyoshi's edict of 1587
