A Complete Course in Mathematics for Class 10 Dec 02 2020 The revised edition of the book entitled A Complete Course in Mathematics for Class X has been written strictly according to the latest Syllabus & Examination Pattern prescribed by CBSE, New Delhi, for the academic year 2022-23 and onwards. As this is the first Board (public) Examination for the students of Class X, efforts have been made that after reading this book, even students of average or below average caliber would not face any difficulty in passing the examinations with flying colours. There are two versions of the maths paper for Class X - Basic and Standard. So, while developing the book, Examples and Questions under exercises have been categorised as Basic or Standard. Plenty of Case Study Based Questions, which are an integral part of the new examination pattern, have also been incorporated. Some Salient Features of the Book are: • The book is strictly according to the latest syllabus prescribed by CBSE for the academic year 2022-23 and onwards. • The text (Definitions, Concepts, Theorems, etc.) has been explained systematically and logically by giving ample number of variety of Solved Examples and Exercises. • All the difficult questions (from NCERT, NCERT Exemplar and other parallel books) have been either solved or provided with the Hints. • Author's Tip to highlight important points have been given. • Handy Hints, wherever required, have been incorporated. • Suggestive categorisation of questions as Basic and Standard, to fulfill the requirement of the latest examination pattern of CBSE, has been given. • Questions from Past Years' CBSE Papers have been incorporated appropriately. • Multiple Choice Questions (MCQs) have been added for better understanding of the lesson. • Synopsis to recapitulate the main concepts learnt in the chapter has been given. • Chapter-wise two Self Evaluation Tests-one for Basic Level and other for Standard Level have been given to revise the whole chapter at one go. • Chapter-wise Case Study Based Questions have been given. • Video Lectures (through QR codes) by the author provide the solutions of difficult questions. I would like to extend my gratitude to entire Goyal Brothers Prakashan Editorial team and IT team. Editorial team's suggestions and contributions have helped me in bringing out this edition of the book in such an excellent form. I have tried my best to keep the book free from mistakes or errors. Still I will be grateful to the readers who point out any error and omission which, in spite of all care, might have inadvertently crept in. It is hoped that this book will meet the requirements of the students, teachers and parents alike. Suggestions and constructive criticism for the improvement of the book will be highly appreciated. You may send your concerns and/or valuable inputs. B K Singh Cell-9717432432 Email: bksinghauthor@gmail.com

Teaching Math to Students with Learning Disabilities Feb 22 2020 This book includes two main sections: a discussion of problem solving and a section on computation with whole numbers. A primary theme of the text is that problem solving sets the stage for meaning and conceptual development with respect to numbers. The section on problem solving includes numerous problem-solving activities that have a dual purpose: the enhancement of language comprehension and cognitive development, and the enrichment of experiences in arithmetic problem solving. The section on computation stresses the use of both traditional and alternative arithmetic algorithms. The latter are introduced so as to provide the teacher with a means to enhance performance in the area of whole number arithmetic in such a way that the difficulties of the student are circumvented. Providing a range of arithmetic activities useful in both the general education and special education settings, the book addresses needs of students in both general education and special education.

*The Legacy of the Inverse Scattering Transform in Applied Mathematics* Aug 18 2019 Swift progress and new applications characterize the area of solitons and the inverse scattering transform. There are rapid developments in current nonlinear optical technology: Larger intensities are more available; pulse widths are smaller; relaxation times and damping rates are less significant. In keeping with these advancements, exactly integrable soliton equations, such as  $\$3\$$ -wave resonant interactions and second harmonic generation, are becoming more and more relevant in experimental applications. Techniques are now being developed for using these interactions to frequency convert high intensity sources into frequency regimes where there are no lasers. Other experiments involve using these interactions to develop intense variable frequency sources, opening up even more possibilities. This volume contains new developments and state-of-the-art research arising from the conference on the "Legacy of the Inverse Scattering Transform" held at Mount Holyoke College (South Hadley, MA). Unique to this volume is the opening section, "Reviews". This part of the book provides reviews of major research results in the inverse scattering transform (IST), on the application of IST to classical problems in differential geometry, on algebraic and analytic aspects of soliton-type equations, on a new method for studying boundary value problems for integrable partial differential equations (PDEs) in two dimensions, on chaos in PDEs, on advances in multi-soliton complexes, and on a unified approach to integrable systems via Painleve analysis. This conference provided a forum for general exposition and discussion of recent developments in nonlinear waves and related areas with potential applications to other fields. The book will be of interest to graduate students and researchers interested in mathematics, physics, and engineering.
