Ontologies for Agents: Theory and Experiences Nov 10 2020 The volume aims at providing a comprehensive review of the diverse efforts covering the gap existing

between the two main perspectives on the topic of ontologies for multi-agent systems, namely: How ontologies should be modelled and represented in order to be effectively used in agent systems, and on the other hand, what kind of capabilities should be exhibited by an agent in order to make use of ontological knowledge and to perform efficient reasoning with it. The volume collects the most significant papers of the AAMAS 2002 and AAMAS 2003 workshop on ontologies for agent systems, and the EKAW 2002 workshop on ontologies for multi-agent systems.

Internecline Feb 23 2022 "Smart, scathing, and verbally inventive to an astonishing degree, David J. Schow is one of the most interesting writers of his generation."—Peter Straub "Inter-what?" When advertising executive Conrad Maddox returns from a redeye flight and finds a mysterious locker key waiting in his rental car, he discovers a briefcase loaded with guns and money. Several hours later, his entire life tumbles down a rabbit hole when he meets Dandine, owner of the case and former contract assassin for a shadowy organization called Norco, which is now out to nail both of them.

"Internecline" means conflict, mutual destruction, and slaughter—or, as Dandine tells Conrad, they are now inadvertently at play in a field of "terrorism, counter-assassination, military coups, dirty tricks, Watergate, spy vs. spy, murky secret organizations, that sort of thing." A world in which being innocent can't save you, the police can't help you, and your only hope of getting out alive is to risk unheard-of dangers against opponents with nearly unlimited power. To free themselves from the spider web of black ops, murder, madness and betrayal, Dandine and Conrad must delve ever-deeper into the spiraling, dangerous maze that is Norco, where everyone seems to be in on the most lethal of games...except you.
